About the Article

Title

Modified SIR model for COVID-19 transmission dynamics: Simulation with case study of UK, US and India

Authors

Pranati Rakshit, Soumen Kumar, Samad Noeiaghdam, Unai Fernandez-Gamiz, Mohamed Altanji, Shyam Sundar Santra

Journal

Results in Physics

Title

- Is the title appropriate?
- Is it lengthy?

Abstract

- The abstract is adequate in length.
- The abstract specifies the research problem adequately.
- The methodology to be used to achieve the objectives of the study is well defined.
- The findings of the research are defined.
- The authors have not specified the conclusions and recommendations that arise from their study.

Introduction

- Is background information on the problem presented.
- Is the review comprehensive?
- Are all cited references relevant to the problem under investigation

Methods

- Is the method adequate for this research?
- Are the equations derived clearly?
- Are the methods helping in answering the research questions
- Give suggestions for improvement
